ST4STEM Fellowship (January - May, 2013)

Are you interested in learning more about technology integration? Design-based learning and instruction? Transforming how you teach? If so, spend the semester with us as a ST4STEM Fellow!

The ST4STEM Fellowship is available to Arizona high school science, technology, engineering, and mathematics (STEM) career and technical education teachers *in the content areas of agriscience, bioscience, engineering, information technology, communications media technologies, electronic technologies and precision manufacturing.*

As a Fellow, you will participate in a semester-long online course designed to help you transform your teaching! You will learn how to use information communications technologies (ICT) to support STEM activities in your classroom, increase the ability for you and your students to collaboratively learn, and apply STEM skills using these technologies. You will leave the course with learning labs and activities specific to your content area that utilize the engineering design process and technology!

**This is NOT your typical online course!
It's FUN, USEFUL and UNIQUE!**

Not eligible?

You are invited to participate as a non-grant participant! Non-grant participants will have full access to the course, but will NOT receive stipends, paid tuition, college credit or other grant benefits. Non-grant participants completing the course will receive a certificate of completion.

Benefits to Teachers

- \$350 stipend
- Experience a game-based learning management system
- Technology training and support
- Credit hours and tuition for CTE 230: Educational Technology
- Stipends for students
- Opportunities to network with other CTE teachers
- Instructional technology books
- Career pathway connections for students

Additional Information and Application

Applications are currently being accepted for the Spring 2013 Fellowship. For additional information and to apply, please visit <http://st4stem.com>!
